Note:
All references to QueensQueen’s Park in this document omit the apostrophe in the word QueensQueen’s. Although this is not grammatically correct, this has become accepted in common practice.
Part 1: Introduction

Purpose of the Reserve Management Plan

Preparation of a Reserve Management Plan is required for Pukenamu/Queen's Park under Section 41 of the Reserve Act 1977.

The purpose of a management plan as defined in the Act is to: “provide for the preservation and management of areas for the benefit and enjoyment of the public, including areas with:

- recreational use or potential; or
- indigenous flora/fauna; or
- environmental and landscape amenity or interest; or
- natural, scenic, historic, cultural, archaeological, biological, geological, scientific, educational, community, or other special features or value.”

This Plan provides an outline of Council’s general intentions for the use, development, maintenance, protection and preservation of Pukenamu/Queen's Park.

Reserve Act Classification

Under the Reserves Act reserves are classified and gazetted based on their primary purpose. The bulk of Pukenamu/Queen's Park is classified as a ‘local purpose reserve (site for municipal buildings)’. It was gazetted on 24 March 1982 (Gazette Notice No 48 P1451). Municipal buildings are not expanded on further in the classification, but are considered to relate to buildings for the town or district, or its governing body.

The term ‘municipal buildings’ is considered outdated and the classification is not considered wide enough to cover a number of the buildings in the Park Reserve, such as the Repertory Theatre, the Savage Club Halls, the Band Rooms and St Andrews Hall. A change to the classification of the Park Reserve to ‘local purpose reserve (culture and heritage)’ under Section 24 of the Reserves Act is being undertaken to ensure it more closely aligns with the use of the site. The inclusion of words ‘culture and heritage’ are seen as appropriate given the cultural and heritage significance of the site.

Pukenamu/Queen's Park is made up of multiple land parcels with separate Certificates of Title. Not all of the titles are subject to the Reserves Act, however, for a consistent approach this Plan covers the whole of Pukenamu/Queen's Park. Refer to Appendix 1 for legal title information for each land parcel.

Policy Framework

Council is guided by legislation in regard to providing and planning for reserves and open spaces. The two key Acts of relevance are the Reserves Act 1977 and the Resource Management Act 1991. Relevant strategies, plans, policies and bylaws that should be complied with in relation to Pukenamu/Queen's Park are noted below. Refer to Appendix 2 for further information.

Strategies:
- Leading Edge Strategy (2014)
- Parks and Open Spaces Strategy (2007)

Plans:
- Horizons One Plan
- Whanganui District Plan
- 10 Year Plan (2015-2025)
- Annual Plan (2017-18)

Policies/Guidelines:
- Dog Control Policy (2015)
- Whanganui Smokefree and Vapefree Outdoor Areas Policy (2017)
- Plaques and Memorials Policy (2010)
- Whanganui District Council Arts Policy (2008)
- Whanganui District Public Art Guidelines (2010-2012)
- Whanganui War Memorial Centre Policy (2015)

Bylaws:
- Public Places, Parks and Reserves Bylaw (2016)
- Alcohol Control Bylaw (2016)
Format of the Plan

Part 1 of the Plan provides an introduction to Pukenamu/Queen’s Park.

Part 2 contains Objectives and Policies under the following headings:
- Historical and Cultural Values
- Park Reserve Use
- Buildings, Structures and Facilities
- Natural Values
- Operational Management.

The end of this section includes a Development Plan which shows on a map the proposed ideas for development of the Pukenamu/Queen’s Park over the next 10 years.

Part 3 provides an Action Plan for the Park Reserve. It lists actions, identifies who is responsible and gives an anticipated timeframe for completion.
Description of the Park Reserve
Pukenamu/Queen's Park is situated in the town centre of Whanganui. The Park Reserve covers 7.2 hectares – approximately 5 hectares of this is open space. The Park Reserve's topography consists of a hill with a flat summit and relatively steep sides, with another flat portion to the southwest.

The hill the Reserve sits on was known to Māori as Puke-namu (meaning Sandfly Hill). It was the terminal of a gentle ridge which extended westward to the forested slopes of St. John’s Wood (now known as St John’s Hill).

Areas of wide expanses of lawn provide panoramic views to the surrounding landscape.

The Park Reserve is surrounded on all sides by urban development and to the southwest and western side is the town’s main shopping area. It is located on a remnant sand dune, as is Papatuhou/Cook's Gardens/Papatuhou.

Wide expanses of lawn provide panoramic views to the surrounding landscape. Two significant view shafts are shown on the ‘Existing Environment’ Map on Page 6. One of these is from the Park to Mount Ruapehu, and the other is to the Sarjeant Gallery from Papatuhou/Cook's Gardens, with Mount Ruapehu in the background.

The Sarjeant Gallery (positioned at the top of the hill) acts as a focal point at the end of the axis along Maria Place from Cook's Gardens. The War Memorial Centre and Whanganui Regional Museum with the wide forecourt in between frame the view up the Veteran Steps to the Sarjeant Gallery and strengthen this axis.

Refer to Appendix 2 for historical information about Pukenamu/Queen's Park and a summary of buildings and structures in the Park Reserve (past and present).

Current use
Pukenamu/Queen's Park is recognised as the 'cultural centre' of Whanganui. It contains a number of important public buildings, including the War Memorial Centre, the Sarjeant Art Gallery, Alexander Library, Alexander Heritage and Research Library, Whanganui District Library and Whanganui Regional Museum. The focus for the Council since the last management plan has been on earthquake strengthening of its historic buildings in the Park Reserve, and on obtaining funding for a major extension to the Sarjeant Gallery.

Consultation
A public notice expressing Council’s intent to review the management plan was published in the Midweek newspaper on 7 September 2016.

Flyers were delivered to surrounding property owners requesting feedback and comments, specifically what they liked about the Park Reserve, any issues or concerns they had and any ideas, wants or needs for the Park Reserve going forward.

An online survey was also available through the Council's webpage and social media platforms between 4 November 2016 and 31 January 2017.

Council also attended the Whanganui Home Show on 20 and 21 August 2016 to seek further ideas for the Park Reserve, and staff have met with a number of stakeholders.

At the commencement of the project to review the Management Plan consultation was initiated with Te Rūnanga o Tūpoho, Te Rūnanga o Tamaupoko, Ngā Rauru Kiitahi and Te Rūnanga o Ngati Apa. Only Te Rūnanga o Tūpoho (who are mana whenua of Pukenamu) expressed an interest in being involved in further engagement. A number of meetings were held with Te Rūnanga o Tūpoho representatives, largely focusing on expressing a Māori dimension to the Reserve.
Key matters arisen through consultation:

- Archaeology/History – make people more aware of the significance of the Park Reserve in archaeological terms.
- Māori dimension – provide opportunities for this to be expressed.
- Activate the Park Reserve by providing more things to do, make more family friendly, new technology to engage younger visitors.
- Provide more visitor parking and parking area for band rooms.
- Clarify requirements around new memorials.
- Retain flat grass areas for picnic space, not enough seating/tables.
- Beautify Bell Street frontage.
- Views - trees on Maria Place obscure views from Papatuhou/Cooks Gardens to Pukenamu/Queen’s Park.
- Make more pedestrian friendly.
- Lack of signage.

Reserve Theme

‘The Whanganui Story’ is the theme chosen for Pukenamu/Queen’s Park. This theme emerged during consultation with stakeholders. A change from the previous ‘New Zealand (Māori and European) heritage’ theme was considered necessary to provide more of a Whanganui focus.

Pukenamu/Queen’s Park has a rich and diverse history. ‘The Whanganui Story’ theme is about:

- raising awareness about the importance of the Reserve to Whanganui’s history;
- telling stories about the place - sharing Tangata Whenua, New Zealand and British military, and early settler stories about the Reserve, where known.

How will ‘The Whanganui Story’ be expressed?

‘The Whanganui Story’ could be told in the Reserve through signage (such as story boards), sculptural elements and plantings.

Buildings and Structures in Pukenamu/Queen’s Park

Part 2: Objectives and Policies

Historical and Cultural Values

Historical, Archaeological and Cultural Significance

Pukenamu/Queen’s Park contains significant historical, archaeological and cultural value. The whole of Pukenamu/Queen’s Park is an archaeological site, as archaeological site remains are present over much of the Reserve. It was a Māori Fortress (fighting Pā) in the 1830s and was the site of the last tribal wars in Whanganui in 1832. In the late 1840’s the Rutland Stockade was constructed on the hill and it was used by British troops until January 1870. In 1872 part of the Stockade was taken for use as a prison, and later one of the barracks and cookhouse were used as Immigration Barracks. Between 1882 and 1887 buildings were demolished and beautification of the Park began with planting of pine trees and grass being sown.

The Whanganui Regional Museum has information about the Pā site and Stockade but there is little information outside to acknowledge their existence. Given their importance in Whanganui’s history opportunities exist in the outdoor space to educate and inform visitors to the Park and tell some of Whanganui’s early stories.

Pukenamu/Queen’s Park offers strong visual connections to Mt Ruapehu and the Whanganui River. These natural features are sacred ancestors of Whanganui tangata whenua, who say, ‘Ko au te awa. Ko te awa ko au.’ (I am the river. The river is me).

Pukenamu also has historic and cultural links with Pакaitore (Moutoa Gardens) and Papatuhou (Cooks Gardens), the river and the mountains. These links should be acknowledged in the Park, as they are also areas in the Park that are sacred to local hapu Tangata whenua, and it is important that these areas are respected and protected, and that local hapu Tangata whenua are consulted in regard to in terms of how these areas should be future managed.

The Park Reserve also contains several visible historic items including buildings, structures and historical trees. Many of these are registered with Heritage New Zealand Pouhere Taonga and protected in the District Plan. These features are shown in the Map of Pukenamu/Queen’s Park on Page 6. The District Plan should be referred to for specific rules around these heritage items. There are also specific requirements for archaeological sites. An archaeological authority is required from Heritage New Zealand Pouhere Taonga to modify or destroy any archaeological site. Considering the history of Queen’s Park, Heritage New Zealand advises that an archaeological assessment be carried out prior to any earthworks/land disturbance. This will determine if an archaeological authority should be obtained and help avoid any risk of site damage occurring (and the associated work stoppage that goes with it).

Objective

1. To protect Pukenamu/Queen’s Park in its entirety as an archaeological site and protect sites, features and structures of heritage and cultural value.

Policies

1.1 Any earthworks/land disturbance, other than small scale earthworks/land disturbance for removal of established garden beds/shrubs or replanting in areas already/previously planted, will require an archaeological assessment to determine if an archaeological authority will be required from Heritage New Zealand Pouhere Taonga. Where necessary an archaeological authority will be applied for.
Note: The use of metal detectors in the Reserve to locate objects is not permitted. It is illegal to remove objects on archaeological sites without an archaeological authority.

1.2 Prior to carrying out conservation of heritage features in the Park Reserve consult with Heritage New Zealand Pouhere Taonga and be guided by the ICOMOS New Zealand Charter for the conservation of Places of Cultural Heritage Value 2010.

Objective
2. To raise awareness and provide greater recognition of Pukenamu’s/Queen’s Park’s cultural and heritage value.

Policy
2.1 Promote the telling of Whanganui’s early stories about Pukenamu. Ensure:
   a. Both iwi and early settler narratives are told;
   b. The past use of the hill as a Māori fortress and later a stockade and soldier’s settlement are acknowledged/or represented in a visually appropriate way;
   c. Historic linkages of Pukenamu with Pakaitore/Moutoa Gardens, Papatuhou/Cooks Gardens, the Whanganui River and Mount Ruapehu are acknowledged.

See also Signage section.

Kaitiakitanga (Spiritual Guardianship)
Te Rūnanga O Tupoho are mana whenua, or the traditional authority, to speak for Pukenamu. Tupoho consider Pukenamu to be a site of spiritual, cultural and historic significance. Council recognises that the Māori dimension is largely absent from the Park Reserve and there are opportunities to work with Te Rūnanga O Tupoho to ensure this dimension is appropriately expressed.

Objective
3. To work collaboratively with mana whenua in future developments in Pukenamu/Queen’s Park and ensure a Māori dimension to the Park Reserve is expressed.

Policies
3.1 To continue engagement with mana whenua in regard to future development in Pukenamu/Queen’s Park.

3.2 Te Reo/whakapapa /naming and narratives – To provide traditional place names in keeping with the mita of Whanganuitanga through signage and wayfinding, and provide narratives relating to Pukenamu to tell the Whanganui Story. Use the Māori name of the Park Reserve (‘Pukenamu’) alongside the English name when referring to the Park Reserve in Council publication material and in any new signage erected for the Park Reserve.

3.3 Tohu/landmarks – To acknowledge significant wider cultural landmarks (including wāhi tapu, maunga, awa, mahinga kai and ancestral kāinga) allowing visual connection to significant sites to be created, preserved and enhanced.

3.4 Taiao/environment – Landscape design to consider indigenous plant and tree species where appropriate and their Māori names are identified.

3.5 Mahi Toi/creative expression – Iwi/hapū design professionals and artists are engaged in the design of Māori art work.
Mount Ruapehu provides a powerful backdrop to the ParkReserve.

Example of sculpture in Hamilton
Reserve Use
Pukenamu/Queen's Park is largely used to access cultural facilities in it and for passive recreation such as walking, exercise, relaxation, informal games, sight-seeing and attending public events and war memorial services. The Park Reserve also provides an attractive area of green relief where people can meet, enjoy views, connect with nature, and gain an understanding of the site’s importance in Whanganui’s history. These passive recreation activities are appropriate throughout the Reserve.

Active recreation, which relates to more physical activity such as organised sport and playground activities, is generally not seen as appropriate in the Reserve. A small playground area is proposed at the back of the Davis Library. This is linked to the Library and its small scale makes it appropriate. The Soap Box Derby event where soap box carts race down Drews Ave from the top of the Reserve is more of an active recreation activity, however, as it only occurs once a year this is acceptable.

There has been some debate over the type of activities that should be allowed in the War Memorial Centre. In recent years the Council has been more flexible in what activities can occur in the building in order to ensure the Centre can continue to be economically sustainable.

The provision of play equipment or a dedicated play area has never been considered a priority for Pukenamu/Queen’s Park. The open feel of the Park Reserve has been an important factor in this decision, the Park Reserve is also considered a more passive rather than active space, and also there is the potential for a playground to impact on heritage values present. Nevertheless, there is a desire from some members of the public for the Park Reserve to be more family friendly and also provide some more activities for young people/teenagers.

The outdoor space directly behind the Davis Library will be upgraded and opened up to take advantage of views. The changes will also allow more activities out in the courtyard (including a small space for children to play, with some interactive elements).

Providing free Wi-Fi throughout the Park Reserve is a way to attract more young people to visit and spend longer in the Park Reserve. Parks staff are also considering setting up the Park Reserve as a ‘Magical Park’ which means children can use their phones to hunt for magical creatures. This links to Council’s Leading Edge Strategy theme ‘Powered by Creative Smarts’ which supports the use of digital technologies and smart approaches. Museum and Library School Holiday Programmes could also look at additional activities which utilise the outdoor space – the outdoor movie night is an excellent example.

The use of the open areas needs to be carefully managed in order to ensure activities are compatible with the intent of the Park Reserve and its scenic quality and cultural and heritage values.

Objective
4. To encourage greater use of the Park Reserve for recreation and provide opportunities for children’s play that utilises the natural features and open grass areas.

Policies
4.1 To encourage the Museum and Davis Library staff to organise activities for children and young people which use the outdoor areas of the Park Reserve and use the outdoor plants in education (for example, flax). As part of their event planning staff are encouraged to use sun-smart practices in the running of outdoor events.

4.2 To provide an inviting outdoor area adjacent to the Davis Library which
takes advantage of views, considers shade planning, provides an area of respite, is safe for children to play and flexible enough to allow for a range of outdoor activities.

4.3 To encourage visitors to visit and stay longer in the ParkReserve by providing free Wi-Fi. To consider innovative digital options for play such as setting up as a ‘Magical Park’ which means children can use their phones to hunt for magical creatures.

Objective
5. To encourage the safe enjoyment of the ParkReserve for passive recreational activities, whilst protecting its scenic quality and cultural and heritage values.

Policy
5.1 To ensure the ParkReserve remains visually appealing for visitors through safe and well maintained facilities, grounds and plantings.

Community Partnerships
Opportunities exist to develop partnerships with local community groups in the management of the ParkReserve. This has the benefit of shared resources and a greater sense of community pride in the ParkReserve. In particular, the Whanganui Museum Botanical Group are passionate about the botanical elements of Pukenamu/Queen’s Park and the Council has an opportunity to develop this relationship further and for the community to benefit from their technical botanical input in future planting.

Objective
6. To encourage community groups and volunteers to take an active role in the future of Pukenamu/Queen’s Park and ensure the ParkReserve caters for their needs and values.

Policy
6.1 Provide opportunities for volunteers to be involved with restoration, weed control, planting, and development projects in the ParkReserve.

Dogs
Dogs on a leash are permitted on the whole of the ParkReserve, and the flat grass area beside the Davis Library is a designated off-leash dog exercise area. This is considered a valuable space for dog owners who live in the town centre. Effective dog control is still needed to avoid conflict with other parkreserve users.

Smoking/Alcohol
Alcohol is banned from outside areas of Pukenamu/Queen’s Park under the Whanganui District Council Alcohol Control Bylaw 2016. The Whanganui Smokefree and Vapefree Outdoor Areas Policy sets parkreserves as ‘smokefree’ locations where people are encouraged to refrain from smoking and vaping.
Buildings and Structures
In recent years the Council’s focus for Pukenamu/Queen’s Park has been on earthquake strengthening of the Alexander Library and the Whanganui Regional Museum. Strengthening of the War Memorial Centre is next, this will begin mid-2018.

The Sarjeant Gallery Redevelopment Project will be a significant development project for the Park. Resource Consent has been granted for this project and work is expected to start in 2019.

The Whanganui Regional Museum are planning to obtain a small Victorian building from Whanganui Intermediate School in the near future to set up as an olden day classroom beside the Museum car park. This building will tie in with the other heritage buildings in the Park and would provide another interesting feature for visitors.

Members of the community have also proposed the idea of relocating the Whanganui Observatory from Papatuhou/Cooks Gardens to Pukenamu/Queen’s Park.

Several development ideas have emerged as part of the Town Centre Regeneration Strategy which relate to Pukenamu/Queen’s Park. This Strategy has been adopted by Council and where relevant, actions will be implemented via this Management Plan.

There are limited opportunities for further development in the Park so further development needs to be considered carefully to ensure the Park’s values are retained. ‘Key Open Space Areas’ (shown on the Development Plan on Page 26) have been identified in this Management Plan as important areas for their landscape value and archaeological significance and no further development should take place in these locations.

Objective
7. To preserve the open space character of the Park, and ensure development is consistent with the primary purpose of the Park, the heritage values of the Park and ‘The Whanganui Story’ theme.

Policy
7.1 To limit development to new buildings and extensions to existing buildings. Development should be consistent with the purpose of the Park, designed to enhance the historic character of the Park and ‘The Whanganui Story’ theme, and avoid ‘Key Open Space Areas’ identified in the Development Plan.

Proposed Flag Pole Concept

Proposed concept from Town Centre Regeneration Strategy - to add flag poles to the edges of the forecourt. Flags will introduce colour and movement and help frame the War Memorial forecourt.
Memorials, Plaques and War Memorabilia

Queen’s Park/Pukenamu contains a number of memorials to men and women who served in World War I, World War II, the New Zealand Wars and other wars. Several of these memorials are protected in the District Plan as heritage features – the War Memorial Centre, Cenotaph, Lion Veterans Steps and Soldiers’ Monument and Veterans’ Steps, and the Queen’s Park Memorial Gates (see Map of Pukenamu/Queen’s Park on Page 6 for the location of these memorials).

Two items of war memorabilia previously on display in the ParkReserve (a 25-pounder field gun and two Lady Denison cannons) are currently being restored. The 25-pounder field gun was installed as a memorial to World War II on Queen’s Park to commemorate that conflict. The location of the cannons and gun are still to be determined. The 25-pounder field gun is likely to require protection from the weather to prevent deterioration.

Plaques have been erected throughout the ParkReserve to mark historic features (for example, the Rutland Stockade) or to commemorate members of the community. Trees have also been planted in the ParkReserve as a living memorial and some of these are protected in the District Plan.

Thought needs to be given to the nature, number and location of any future memorials/plaques and other war memorabilia to ensure they are appropriate, retain the open space feel of the ParkReserve and minimise land disturbance on an archaeological site. A ‘Memorial Area’ has been identified on the Development Plan on Page 26 to minimise the impact of future memorials on the ParkReserve’s values.1 Also, further war memorial plaques can be inserted on the stone wall on the edge of the War Memorial Forecourt.

Objective

8. Memorials, plaques, and other similar structures shall reflect the historic nature of the ParkReserve and help to inform ‘The Whanganui Story’.

Policies

8.1 To incorporate plaques in existing structures where possible to minimise ground disturbance. War memorials and plaques shall be located in the ‘Memorial Area’ identified in the Development Plan. War memorial plaques are also permitted on the stone wall on the edge of the War Memorial Forecourt.

8.2 The Parks and Property Department will determine the appropriateness and location of any memorial, plaque or similar structure.

8.3 Temporary memorials (such as wooden crosses erected in the lead up to Anzac Day) shall involve minimal ground disturbance and will require approval by the Parks and Property Department.

Sculptures and Public Art

The Sarjeant Art Gallery and War Memorial Centre buildings are significant works of art in their own right. The Gallery contains a large collection of art, and the proposed extension will allow a much larger number of works to be accessible to the public. The ‘Handspan’ peace sculpture erected in 2002 is the most recent sculptural feature to be added to the ParkReserve.

A series of vertical sculptures is proposed in the Town Centre Regeneration Strategy to help strengthen the important cultural

---

1 For new plaques/memorials reference should also be made to the “Whanganui District Council Plaques and Memorials Policy (April 2010)”. 
connection between Pukenamu/Queen’s Park, Moutoa Gardens/Pākaitore and the Whanganui River.

The heritage plaque on this boulder refers to the Rutland Stockade once occupying the hill.

Cross section of the proposed vertical elements marking the connection between Pukenamu, Pākaitore and the riverfront

Plan view of the proposed vertical elements marking the connection between Pukenamu, Pākaitore and the riverfront

There are opportunities to have other permanent and temporary sculptures in the ParkReserve which could assist with telling ‘The Whanganui Story’. The Whanganui Regional Museum are also proposing to reinstate 11 bronze Carillon Bells (currently in storage) into the ParkReserve. An interactive musical piece of art work is proposed so that they can be played and enjoyed by the public.

The Town Centre Regeneration Strategy also recommends the use of public interactive art to activate spaces in the ParkReserve. Any future sculptures or art work needs to be appropriate, and to consider the open space feel of the ParkReserve.²

Objective

9. To encourage the installation of sculptures and other art features in the ParkReserve to those which are appropriate to the historic values of the ParkReserve and contribute to ‘The Whanganui Story’ theme.

Policy

9.1 To promote the telling of ‘The Whanganui Story’ through sculptural elements in locations identified on the Development Plan. In particular:

- Vertical sculptures to strengthen the cultural connection of Pukenamu/Queen’s Park with Pākaitore/Moutoa Gardens.

- Sculptural element(s) which represents the history of the site (particularly its use as a Pā and a stockade).

Objective

10. To encourage more people to use and enjoy the outdoor space of the ParkReserve through interactive art or other creative elements.

Policy

10.1 To promote the installation of interactive art or other creative elements throughout the ParkReserve. These features could be

² The Whanganui District Public Art Guidelines should be referred to for the addition and removal of public art.
temporary “pop up” interactive art pieces that change throughout the year. These elements could be provided in conjunction with special events and festivals, for example the opening of the redeveloped Sarjeant Art Gallery. Approval may be needed from the Public Art Steering Group.

Example of interactive art features

ParkReserve Furniture

ParkReserve furniture has tended to be simple and functional in design and has reflected the commonly used materials of the time. A review of parkreserve furniture is needed. This will take place following completion of the Sarjeant Gallery extension.

Options such as more moveable seating could be considered to encourage people to relax and stay for longer at the ParkReserve. The introduction of picnic tables is another option to encourage people to stay at the ParkReserve for longer periods. Consideration will be given to furniture which has an art component to provide an opportunity for ‘Placemaking’.

There is currently one outside drinking tap beside the Davis Library. A number of rubbish bins are provided throughout the ParkReserve. The use of recycling bins will be considered when bins are due for replacement. Toilets are provided for the public in the Davis Library.

Whanganui District Council’s Active Transport Strategy 2017 focuses on improving connections between places and making walking, cycling and scootering a popular and safe travel choice for people. Once Pukenamu Drive has been modified to allow for the Sarjeant Gallery extension, cycle sharrow markings (see diagram) are proposed to be added to the road in places to remind drivers that they should expect to see cyclists using the road. The ParkReserve has been identified as an area requiring more bike parking. Currently parking is only provided for bikes outside the Davis Library.

Objective

11. To provide and maintain parkreserve furniture that allows public use and enjoyment of the ParkReserve while still retaining an open space feel to the ParkReserve.

Policy

11.1 ParkReserve furniture will be reviewed and replaced as and when required. Furniture should be functional, fit for purpose and well maintained. Additional seating and tables will be considered to make better use of views. Where possible it will be positioned in sheltered locations and orientated to the sun.

Objective

12. To provide for cyclists using Pukenamu/Queens Queen’s Park, and for cyclists to feel safe using the ParkReserve.
Policies

12.1 To indicate to motorists the likely presence of cyclists and improve cyclists feelings of safety by the provision of cycle sharrow markings.

12.2 To provide attractive and secure bike parking adjacent to major facilities, and designed to fit with existing parkreserve furniture.

Diagram showing possible cycle sharrow marking

Signs
Pukenamu/Queen's Park is lacking in signage currently and this has an impact on how visitors to the ParkReserve experience the space and how easily they can find their way around. The buildings in the ParkReserve are named, however, given the number of buildings and the topography of the site, a map is needed to show what features are where (Maria Place end of the ParkReserve has the most foot traffic so is the most logical place for a map). Signs identifying the name of the ParkReserve would be helpful at other vehicle and pedestrian entrances.

The introduction of narrative and graphic signage at key locations would also provide an opportunity to educate and inform parkreserve visitors of the ParkReserve’s historical, archaeological and cultural significance and tell the Whanganui Story from past to present (see also Policy 2.1).

With any new signage consideration needs to be given to how it will impact on the open space nature of the ParkReserve, and the need to minimise ground disturbance of this archaeological site/landscape. The opportunity also exists to consider new technology when designing signage, for example, the use of QR codes for people to scan from their mobile devices and access further information about a building or feature.

Objective

13. To inform parkreserve visitors of the key features in the ParkReserve and tell “The Whanganui Story”.

Policies

13.1 To provide signage in the ParkReserve which identifies and narrates parkreserve features (past and present), directs you to the location of parkreserve features and tells ‘The Whanganui Story’ theme. This links to Policy 2.1 ‘Historical and Cultural Values’ section.

13.2 Signage is to be cohesive in design and fit with ‘The Whanganui Story’ theme.

Lighting
Lighting is provided in places around the ParkReserve to accentuate special features, particularly the Sarjeant Gallery. Lighting is provided around the War Memorial Centre as this facility is used at times in the evenings. Also, the Sarjeant Gallery extension plans to have night-time events so lighting will be provided around the building for visitor safety. The Council does not wish to actively encourage the use of the Park after dark so a lack of lighting is a strategic decision to discourage visitors from using certain spaces where a lack of surveillance could create unsafe areas.

Current lighting fails to portray the ParkReserve and its features in their true magnificence. Existing lighting results in a flat image of the buildings rather than a 3-D image. Lighting along Maria Place and Majestic Square also impacts on the view
towards the Veteran Steps and Sarjeant Gallery (particularly the amount of lights and the glare).

There are opportunities for the Gallery to have subtle lighting changes over the course of the evening, with perhaps different effects between weeknights and weekends, and/or seasons of the year. The Town Centre Regeneration Strategy 2017 also suggests introducing lighting effects and animating facades to create visual interest. UCOL could be approached to assist with these projects.

Objective
14. To ensure Pukenamu/Queen’s Park is a positive part of Whanganui’s night character.

Policies
14.1 To highlight special features in the ParkReserve with lighting (in particular, the heritage features and sculptural elements). Consider subtle changes in lighting over the course of the evening, with different effects between weeknights and weekends, and/or seasons of the year.

14.2 To encourage the use of coloured lighting animations and special lighting effects on buildings/features in the ParkReserve for special events and celebratory occasions.

Objective
15. To provide safe and appropriate lighting in the ParkReserve.

Policies
15.1 The principles of Crime Prevention through Environmental Design (CPTED) shall be applied to lighting design. Paths or spaces not intended for night-time use should not be illuminated, to discourage their use.

15.2 Ensure any lighting for Pukenamu/Queen’s Park is consistent in design where possible, and considers the wider context, in particular, providing consistency with lighting in Majestic Square. Lighting fixtures should be compatible with other parkreserve furniture.

15.3 Consideration shall be given to using modern technology and energy efficient fixtures (e.g. LED replacements for standard metal halide lights).

Utilities
Queen’s Park has a number of utilities located in the ParkReserve, such as electricity and telephone wires and electrical substations. It is important that the management plan allows for ongoing maintenance and upgrading of existing utilities in the ParkReserve to ensure a safe and reliable service is provided.

Some of Powerco’s existing assets in the ParkReserve are not protected by easements and therefore their location is not always apparent. In order to avoid risk of injury or service disruption if lines are accidently dug into, the location of underground infrastructure should be identified prior to works commencing. Where works are proposed in close proximity to any overhead electricity line, individuals are advised to contact the line operator to discuss the works.

Utilities can also have an adverse impact on the character of the ParkReserve and its open space quality, so where possible they should be located underground, and Parks staff should be consulted in regard to any new utilities.

A water bore services the ParkReserve. This is located on the bank above the Police Station.

Footnotes:
3 Information on the location of underground pipes and cables can be obtained through the ‘Dial Before You Dig’ service found online at http://www.beforeudig.co.nz/#.
Objective

16. To continue to support the ongoing operation, maintenance and upgrading of network utilities in the ParkReserve and protect these assets from activities and development in close proximity (including earthworks).

Policies

16.1 To recognise and provide for the operation and maintenance of existing network utilities with the ParkReserve.

16.2 Ensure that activities and development in Pukenamu/Queen’s Park maintain safe separation distances from electricity infrastructure at all times, in accordance with the New Zealand Code of Practice for Electrical Safe Distances NZECP 34:2001.

16.3 The location of underground infrastructure should be identified prior to works commencing to ensure that infrastructure is not accidentally disturbed and to avoid serious injury or costly service interruption.

16.4 Where works are proposed in close proximity to any overhead or below ground electrical line, individuals are advised to contact the line operator to discuss the works.

16.5 To allow removal or trimming of vegetation (including emergency work needed to maintain or restore electricity or telecommunications connections) by contractors approved by the Parks and Property Department, whilst keeping excavations to a minimum and taking into account requirements for archaeological sites under the Heritage New Zealand Pouhere Taonga Act 2014.

16.36 To allow unobtrusive health and safety signage associated with network utilities in the ParkReserve with approval from the Parks and Property Department.

Objective

17. To allow the establishment of new network utilities in the ParkReserve where there is no other practicable option for their location, they are compatible with the function of the ParkReserve and there is minimal impact on heritage values, public use, enjoyment or general visual amenity of the ParkReserve.

Policies

17.1 Where possible future public utilities shall be located underground.

17.2 An easement will be required for all new network utilities in the ParkReserve in accordance with Section 48 of the Reserves Act 1977.

Also refer to archaeology requirements under Policy 1.1.

Vehicle Access and Roading

There are four vehicle entrances to Pukenamu/Queen’s Queen’s Park – end of Campbell Street (main entrance), Drews Avenue, and two off Watt Street (one to museum car park and the other to War Memorial Centre forecourt). At the Cameron Terrace and Drews Ave entrances there is nothing to announce your arrival at the parkReserve, and this is an important element that would enhance the experience of the ParkReserve.

The historic Queens Park School Memorial Gates are located adjacent to the Cameron Terrace entrance. The gates are currently not very visible to park visitors. Landscape Designer, Everdien van Eerten, provided landscape observations to assist in the development of the Draft Management Plan. Ms van Eerten suggests clearing vegetation...
from around the Memorial Gates and adding landscaping to make the gates more visible.

The amount of vehicle access points to the ParkReserve has resulted in facilities being more accessible, however, as Pukenamu Drive runs right through the Park it has had the effect of severing the ParkReserve. The internal roads conflict with pedestrian and cyclist use of the ParkReserve.

The roading layout will change as a result of the Sarjeant Gallery extension, and modifications will result in a safer and simpler layout. Originally the road between the Alexander Research Library and the Sarjeant Gallery was to be removed to simplify the road layout. This section of road is now to be retained to allow delivery vehicles to access the Gallery.

Objective
18. To provide a safe and user-friendly roading layout throughout the ParkReserve.

Policy
18.1 To limit further internal roading in the ParkReserve and improve the functionality and safety for vehicles, cyclists and pedestrians.

Objective
19. To create a sense of arrival at the main vehicle entranceways to the ParkReserve.

Policies
19.1 To enhance Cameron Terrace and Drews Avenue vehicle entrances so they create a sense of arrival for visitors to the ParkReserve through the use of landscaping, signs and structures (where appropriate).

19.2 To highlight the memorial gates on Cameron Terrace and encourage their use as part of an entrance enhancement for the ParkReserve.

Car Parking
Car parking in Pukenamu/Queen’s Park allows the ParkReserve to be more accessible for visitors, however, it does reduce amenity and green open space. A significant amount of car parking is provided in the ParkReserve and on the perimeters. Formed and marked parking is provided behind the Museum, adjacent to the District Davis Library, beside the Alexander Library, and in many locations on Pukenamu Drive. The War Memorial Centre forecourt is also used for parking when events are on in the building.

The Savage Club buildings contain some space for parking in front of the hall, however, no spaces are marked. Formed and marked parks also exist behind the Savage Club buildings at the base of the hill. These Council car parks are not available for parkreserve users and are leased out to businesses in the locality.

As part of the Sarjeant Gallery extension the car park beside the Davis Library will be extended (by 20 spaces) to cater for increased numbers expected as a result of the new gallery and associated café. The alterations to the road required for the gallery extension will also involve creating a formed access to a loading dock at the back of gallery extension and new formed access, loading area and car park for the band rooms.

Providing designated disabled car parking in close proximity to the entrance to buildings on the site is important.

Objective
20. To soften the appearance of car parking areas and maintain the green open space feel of the ParkReserve by limiting further car parking.

Policies
20.1 To soften the appearance of car parking areas through the use of landscaping where possible and providing shade from trees.
20.2 To limit further car parking to that which is approved as part of the Sarjeant Art Gallery extension.

20.3 To recognise the importance of the War Memorial Centre forecourt primarily as a pedestrian space with allowance for to be used for car parking, but only in relation to events in the ParkReserve.

20.4 To continue to manage car parking in the ParkReserve through the use of time limits where necessary. Consider provision for some longer term parking (e.g. 3-hour limit) to encourage visitors to stay for a longer period.

Pedestrian Access, Disability Access, and Pathways

Access
The main pedestrian access to the ParkReserve is via Watt Street (onto the Memorial Centre Forecourt). The open expanse of the War Memorial Forecourt allows the powerful view up the Veteran Steps to the Sarjeant Gallery to be experienced and provides a great sense of arrival. Pedestrians can also enter the ParkReserve from paths off Bell Street (near St Andrews Hall), Cameron Terrace, the top of Drews Avenue, and off Watt Street (behind Savage Club). Enhancing the main entrances through landscaping and signage will provide a more inviting approach to the ParkReserve.

Pathways
Generally, paths are in good condition, however, some additional paths are needed between the buildings/features at the top of the hill. As part of the Sarjeant Gallery extension additional pathways will be provided to improve pedestrian circulation.

A path between Cameron Terrace and the top of the hill (near the Alexander Library) will be removed as it is rarely used.

The ParkReserve has access to the central city bus route. The bus stop is located on Watt Street near the War Memorial Forecourt.

Objective
21. To encourage greater pedestrian use of Pukenamu/Queen’s Park by providing attractive pedestrian entrances and pathways which are safe and accessible and provide clear linkages to facilities and features.

Policies
21.1 Ensure pathways are safe, taking into account CPTED principles and enhance pedestrian entrances by providing a sense of arrival through the use of landscaping and signage.

21.2 To identify desired path lines to facilities and features within the ParkReserve and consider providing additional pathways, and removing those that are unnecessary.

Helicopter Landing Space
The Police occasionally require a helicopter to land at the Northeast end of the ParkReserve near the pathway that leads down to Bell Street. This is for emergency situations only and relates to Search and Rescue and Armed Offenders Squad operations when a police officer needs to be picked up urgently.

Objective
22. To provide for helicopter landings at the Northeast end of the ParkReserve near the Bell Street pathway for emergency situations.

Policy
22.1 The landing of helicopters at the ParkReserve is to be permitted for emergency rescue purposes.
From Memorial Forecourt looking up towards the Sarjeant Art Gallery

Handspan Peace Sculpture
Natural Values

Geology and Soils
The basement rock beneath Pukenamu/Queen’s Park is likely to be Greywacke. Overlying the basement rock are thick marine sediments. Above these layers, as a result of sea level rise, there are deposits of beach, marine and dune sands, shells and lignite bands. Volcanic sands from the then active Taranaki and Ruapehu volcanoes are also present.

During the Holocene period the sea began to retreat leaving behind a formation of sand dunes (the Patea dune sand). Pukenamu/Queen’s Park is located on one of these remnant dunes, as is nearby Papatuhou/Cooks Gardens.

An artesian aquifer occurs in a shingle, shell and sand layer. In the 1870’s a well was sunk to serve the troops occupying the Rutland Stockade. This well is located near the existing Whanganui Davis Library.

Modification of the original dune surface has taken place by excavation, flattening and filling for various developments. The dune shape is, however, still apparent and dominates the topography of the area.

Given the Reserve’s sandy soil, the ecological district could be taken as the ‘Foxton Ecological District.’ Both the topography and the sandy soils enable the Reserve to be relatively free draining, but wind and seasonal moisture deficiencies limit vegetation.

Views/Landscape Values
The green space that Pukenamu/Queen’s Park offers in the town centre is valuable from an amenity point of view – the wide expanses of lawn are pleasing to look at and soften the buildings and structures in the Park Reserve. ‘Key Open Space Areas’ identified in the Development Plan are seen as important for their landscape value and no further development should take place in these locations (see Policy 7.1 under Buildings and Structures).

Due to the Park Reserve’s elevated position it is highly visible from many locations and the Park Reserve provides spectacular views to Mount Ruapehu, the river and distinctive landmarks, including the Durie Hill Memorial Tower and Cooks Gardens/Papatuhou.

Important view shafts are shown on the Map of Pukenamu/Queen’s Park (Page 6). A View Protection Plane in the District Plan provides restrictions on the height of buildings between the Park Reserve and the river to the North to ensure views in this direction are retained. Most view shafts are unimpeded, however, the view to/from Cooks Gardens/Papatuhou is impeded by a number of trees in Majestic Square. A regular maintenance regime is proposed to maintain viewshafts.

Objective
23. To protect, and enhance where possible, views from the Park Reserve to Mount Ruapehu, the Whanganui River, Durie Hill and Cooks Gardens/Papatuhou and from outside the Park Reserve to the Sarjeant Gallery and ‘Key Open Space Areas’.

Policy
23.1 To protect ‘Key Open Space Areas’ and viewshafts in Pukenamu/Queen’s Park which need to be retained for the amenity value they provide.
Trees and Gardens

The Park Reserve contains a broad mix of both native and exotic species. (refer to Appendix 3 for a Map and List of Existing Trees and Shrubs). There are a number of large specimen trees of high amenity, and in some cases, historical value in Queen's Park. Many of these trees are recognised for their value and are protected in the District Plan (the location of the Protected Trees is shown on the Map of Pukenamu/Queen’s Park, Page 6).

The Reserve contains a number of groups of trees/shrubs of the same species, including:

- Australian trees and shrubs (largely on the slopes of the Reserve). Australian species make up 33% of the tree and shrub species present;
- Phoenix Palms;
- Pines (on the slope above Drew's Avenue);
- Pohutukawa's (form a semi circle on one side of the World War I Cenotaph);
- Native species (at the entrance to the Museum and throughout the Reserve); and
- Turkey and English Oaks (near the Sarjeant Gallery).

The lines of Phoenix Palms (Canary Island Date Palms) provide a strong vertical element that helps strengthen the formal lines and symmetry of much of the architecture. They provide an ‘avenue-like’ entrance from Campbell Street – this will be enhanced with the new entrance to the Sarjeant Gallery providing a focal point at the end of the avenue. The Sarjeant Gallery extension will result in the removal of 10 Protected Trees – 5 Canary Island Date Palms and 5 English Oaks. The loss of these trees was considered as part of the Resource Consent application for the Gallery extension and following completion of the work additional Phoenix Palms, Nikau Palms and Oak trees will be planted near the Gallery. This planting is shown on the Development Plan.

Council is responsible for maintaining all trees, shrubs and gardens in the Park Reserve and undertook a tree condition survey in early 2017. This survey revealed that the majority of the trees are in good condition, however, a small number of trees were identified as needing replacement. The report recommends the trees be inspected on an annual basis. The trees also should be inspected following a storm event as strong winds and heavy rain can weaken the structural integrity of trees.

The removal of stumps and the creation of any new garden beds, or planting of trees in areas currently unplanted will need to be covered in a comprehensive archaeological assessment for the Park Reserve due to the ground disturbance involved (see Policy 1.1).

Council is considering whether to retain the Pine Trees (Pinus adiate) near the Drews Avenue entrance to the Park Reserve. It has been brought to the Council’s attention that the pine near the Cenotaph which is protected because it was believed to a Gallipoli Pine (Pinus brutia) is in fact an Aleppo Pine (Pinus halepensis). One of Whanganui Botanical Group’s members has young plants of a ‘true Gallopi Pine’ which could be planted to provide that historical link.

The wider context is considered important in terms of future planting and landscape design. In particular, maintaining significant view shafts and ‘Key Open Space Areas’, continuing with formal lines, and strengthening the existing axes (North/South up to the Sarjeant Gallery and Mount Ruapehu and East/West up to the Cenotaph). Strengthening the optical effect of an axis could be achieved by adding paving or bands of planting.

Landscape observations of the Reserve by local landscape designer, Everdien van Eerten, stressed that care needs to be taken in introducing new structural species in the
Consideration should also be given to how future planting ties in with ‘The Whanganui Story’ theme for the Park Reserve. It would be appropriate for planting to have some connection with Whanganui, tell some of our history where possible, and provide educational opportunities. For example, Chatham Island Nikau plants between the Museum and the Memorial Forecourt are a link to the Museum’s 1969-1970 ‘Tāiko Expedition’ to the Chatham Islands. Matagouri (Discaria toumatou) is an example of a shrub which could be planted. It is native to Whanganui and is currently in decline. Thorns of this shrub were used by early Māori for tattooing.

Plants can be eco-sourced from seed and cuttings from the nearest similar vegetation type in the ecological district. This preserves the genetic biodiversity and plants are adapted to local conditions so are more likely to survive and thrive.

Some tree planting along the Bell Street frontage is being considered to enhance this side of the Park Reserve. Also, further planting on the slopes above the Police Station, behind the Savage Club Halls and above Ridgway Street is being considered to enhance these areas and assist with erosion control. The Landscape Observations noted that the areas that lend themselves to freeform native species planting are the steeper slopes.

Objective
24. To enhance the Park Reserve’s buildings and features with planting.

Policy
24.1 To assess current planting, park reserve furniture, pathways and provide an overall landscape plan and planting programme which maintains and strengthens the formal lines and existing axes and contributes to ‘The Whanganui Story’ theme while maintaining significant view shafts and ‘Key Open Space Areas’.

24.2 All trees and vegetation planted near overhead electricity lines or underground cables area selected and/or managed to comply (including when maturity is reached) with the Electricity (Hazards from Trees) Regulations 2003 and the New Zealand Code of Practice for Electrical Safe Distances NZECP 34:2001.

See also Utilities section regarding planting in close proximity to electricity lines.

Fauna
There are no known significant species of fauna inhabiting the Reserve. Limited surveying has revealed typical garden insects and birds found elsewhere in suburban Whanganui. Whanganui Regional Museum have indicated that they would like to undertake further surveys of fauna.

Objective
25. To enhance understanding of the fauna present in Pukenamu/Queen’s Park.

Policy
25.1 To investigate methods to better understand the fauna present in the Reserve including possible surveys.

Plant and Animal Pests
There are currently no animal pests of concern in the Park Reserve. Plant pests can cause a problem in Park Reserve areas if they are invasive and threaten the growth of plants/trees and the aesthetics of the Reserve, given the number of large trees present.4

Planting nectar-producing species in the Reserve could be considered to attract more native birds.
**ParkReserve.** Council will meet its obligations to remove plant pests identified in the Horizons Regional Council Regional Pest Plant Management Strategy.

The Whanganui Museum Botanical Group voluntarily surveyed and identified weeds in Pukenamu/Queen’s Park in February 2017. Working bees which involve community effort and resources will be considered to help tackle weeds of concern.

**Objective 265.** To manage and control animal pests and plants identified in the Horizons Regional Council’s Regional Pest Plant, and Regional Pest Animal Management Strategies.

See also Policy 6.1 regarding the potential for community groups to be involved in weed control.

---

The Phoenix Palm Trees are a distinctive feature at the ParkReserve.

**Operational Management**

*ParkReserve Maintenance*

Pukenamu/Queen’s Park is identified as one of Whanganui’s ‘Premier Parks’. These parkreserves are considered to be well established and fill a significant and high profile role in the community. They are iconic, tourist focused and of economic benefit. A high standard is expected in terms of lawn mowing, pruning, maintenance of parkreserve furniture and removal of rubbish. Maintenance of Pukenamu/Queen’s Park is carried out by contractors under a Maintenance Contract.

**Objective 276.** To undertake maintenance of the ParkReserve and facilities at a frequency and to a standard so as to maintain high visual amenity in the formal areas of the ParkReserve.

**Policy 276.1** The ParkReserve will be maintained to the levels of service identified in Council’s Maintenance Contract consistent with the ParkReserve’s status as a ‘Premier Park’.

| 27 | **Pathways:** Investigate “desire lines” for accessing facilities and features in the ParkReserve and develop further pathways as needed. In particular, consider pathways for the following:  
  - Top of Veteran Steps and Sarjeant Gallery to Cenotaph and Peace Sculpture  
  - Back of the Alexander Library to Davis Library  
  - Top of Bell Street path to Davis Library – consider safe crossing point for pedestrians through car park.  
  Consider removal of path that goes from road by Alexander Library across hill to Cameron Terrace. | 21.2       | Years 1-10 | Parks                                                                           |
|    | **Natural Values**                                                                                                                                                                                                                                               |
| 28 | **Trees and Gardens:** Develop and implement a landscape plan and planting programme for whole ParkReserve, in particular:  
  - Create a sense of arrival at Cameron Terrace and Drews Avenue vehicle entrances through signage and landscaping and possibly a sculptural element.  
  - Investigate incorporating the memorial gates on Cameron Terrace into any entrance enhancement for the ParkReserve.  
  - Provide landscaping of Museum and Davis Library car parks (following extension to Davis Library car park).  
  - Introduce landscaping and signage (ParkReserve name) at pedestrian entrances to improve their appearance and provide a sense of arrival. | 24.1, 19.1, 19.2, 20.1, 21.1 | Years 1-2 (Develop Landscape Plan) Years 1-10 (Implement plan) | Parks and mana whenua with assistance from landscape architect/designer |
| 29 | Investigate options, funding and implementation of a survey of fauna living in Pukenamu/Queen’s Park.                                                                                                     | 25.1       | Years 1-5  | Museum with assistance from local schools.                                    |
### Resource Management Act 1991

The purpose of this Act is to promote the sustainable management of natural and physical resources. In managing land in the Park Reserve, the Council must recognise and provide for the following relevant matters of national importance:

- (e) the relationship of Māori and their culture and traditions with their ancestral lands, water, sites, waahi tapu, and other taonga;
- (f) the protection of historic heritage from inappropriate subdivision, use, and development...

Section 6 of the Act includes other matters that the Council shall have particular regard to, including:

- (a) kaitiakitanga
- (aa) the ethic of stewardship
- (c) the maintenance and enhancement of amenity values
- (f) maintenance and enhancement of the quality of the environment
- (i) the effects of climate change.

Section 8 also states that the Council must take into account the principles of the Treaty of Waitangi (Te Tiriti o Waitangi). In particular, the principle of partnership – incorporating a duty to act reasonably, honourably and in good faith, and a duty to make informed decisions.
Heritage New Zealand Pouhere Taonga Act 2014
This Act promotes the identification, protection, preservation, and conservation of the historical and cultural heritage of New Zealand. The whole of Queen’s Park/Pukenamu is an “archaeological site”. An archaeological site is defined in the Act as “any place in New Zealand (including buildings, structures or shipwrecks) that was associated with pre-1900 human activity, and that is, where there is evidence relating to the history of New Zealand that can be investigated using archaeological methods.”

Under this Act all archaeological sites are protected from any modification, damage or destruction whether the site has been previously recorded, or is unrecorded. Archaeological sites are finite and non-renewable resources. They are often very fragile and vulnerable. Any person wanting to modify, damage or destroy an archaeological site must apply to Heritage New Zealand Pouhere Taonga in Wellington for an authority to do so.

Te Rūnanga O Tupoho has a critical role to play in the discovery of any archaeological material and in preventing and minimising impacts on cultural values.

Regional Context
The Horizons One Plan contains objectives and policies relating to protecting historic heritage, including those registered under the Heritage New Zealand Pouhere Taonga Act 2014 and emphasizes the responsibility of district councils to identify and protect places of heritage value.

Local Context
There are a number of local strategies, plans and bylaws that have relevance to the management and use of Queen’s Park/Pukenamu in the District. These have been listed in Part 1: Introduction.

Whanganui District Plan
The District Plan defines the way in which the district’s natural and physical resources will be managed to achieve the principles and purpose of the RMA. The District Plan recognises management plans prepared under the Reserves Act as a method to implement its objectives and policies. The following chapters are relevant:

Chapter 8 – Reserves and Open Space – The majority of Queen’s Park/Pukenamu is zoned Reserves and Open Space. The Council seeks quality reserves and open spaces which are “safe, accessible and pleasant to use, that meet the varied recreational needs of the community and enhance the amenity values of the surrounding environment.”

The following matters are also of relevance:

b. Implementing CPTED principles to ensure safety in and around parks and open spaces including access ways.
d. Ensuring that any buildings, parking facilities and vegetation are integrated into reserve sites and do not compromise the character of the site and surrounding environment.
e. Avoidance of nuisance from traffic, noise, glare or other adverse environmental effects on the surrounding environments.
f. Retention of natural landscape and historic heritage features.
g. A variety of passive and active recreational needs are provided for.

The following activities are permitted in this zone: recreation facilities and activities, temporary commercial activities, tree maintenance, and network utilities subject to Performance Standards (rules). These rules are designed to prevent activities on the Park Reserve from having an adverse effect on adjacent land or the wider community (for example, flood lights at a sports ground may adversely affect nearby residents).

Chapter 5 – Commercial – The Repertory Theatre and Savage Club are zoned Arts and Commerce. This zone is characterised by heritage sites, features and buildings, and has a mix of boutique, commercial and arts activities reliant on pedestrian movement. A number of views to and from Queen’s Park/Pukenamu are recognised and protected in the Commercial Chapter.
Chapter 9 – Cultural Heritage – recognises and protects historic heritage items in the Park Reserve. There are a number of listed heritage buildings/structures in Queen's Park/Pukenamu (see Summary of Structures in Queen's Park Reserve in Appendix 2), and the Park Reserve is identified as an archaeological site.

Chapter 10 – Natural Environment – deals with Protected Trees in the Park Reserve. Development on or around these trees is limited in order to sustainably manage these resources for the duration of their lifespan. Protected trees are shown on the Existing Environment Map (Page 6).

Chapter 15 - Tangata Whenua and Papakāinga – responds to requirements of the RMA with regard to Tangata Whenua and requires recognition of and provision for the special relationship of Māori and their culture and traditions with ancestral lands and other resources. Pukenamu is significant for Tangata Whenua.

Chapter 16 – Signage – controls signage to ensure it does not produce adverse effects in the community.

Chapter 22 – Network Utilities – sets out how Council will manage network utilities to ensure they do not have an adverse effect on the environment.

Long Term Plan 2015-2025
The Long Term Plan sets out what Council plans to do between 2015 and 2015, how it will be done and how it will be paid for. The Sarjeant Gallery redevelopment is one of the key projects identified. Council has agreed to a $4 million contribution for earthquake strengthening of the building.

Leading Edge Strategy 2014
In 2014 the Council adopted a “leading edge” vision and purpose statement for the Whanganui District Council and its community.

Key elements identified in the Strategy relevant to Pukenamu/Queen's Park are:

Connectivity
- Making our district more walk and cycle friendly – enhance urban cycle and pathway connections, provide more bicycle parking, and improve open space linkages.

Creativity
- Retain our historic and cultural heritage as a key point of difference.
- Facilitate the use of digital technologies and smart approaches to drive innovation and productivity.
- Sustain and nurture our arts reputation – support the Sarjeant Gallery redevelopment project as a powerful arts anchor.

Environment
- Ensure our built environment reflects 21st century needs while protecting our distinctive heritage – manage our assets, facilities and infrastructure responsibly and sustainable on behalf of the community.
- Generate a buzz through events.

Economy
- Ensure our services and facilities reflect the diverse and changing needs of our community.

This strategy endeavours to make both Whanganui and its assets and qualities more prominent both nationally and locally, as well as proposing to strengthen existing and create new ones. The strategy talks about the strength of Whanganui’s arts and cultural presence in the town centre and about how this can be further enhanced.

Parks and Open Spaces Strategy 2007
This strategy acknowledges the fact that Queen's Park is identified by Whanganui District Council as a “Premier Park.” These park reserves are “well established and fill a significant and high profile role in the community. They are iconic, tourist focused and of economic benefit.” One of the strategic goals of this strategy most applicable to Pukenamu is “a new
and creative development focus at premier parks”, It suggests focusing on events to boost the appeal, promotion and use of these park reserves, considering new attractions and seasonal projects.

Soap Box Derby is held every year at the Park Reserve.
Pukenamu/Queen’s Park has significant history for Whanganui. Over the past 180 plus years this once barren sand hill has been a Māori Pā, a military stockade and associated soldiers’ settlement, squatter’s cottages, a gaol, and is now a local Park Reserve.

In the 1830’s Pukenamu was occupied by Māori and was used as a fighting Pā. It was an ideal site as it commanded a fine view of the river and its mouth. In 1832 the Whanganui and Ngati Tūwharetoa tribes used the Pā to defend themselves from an attack by the Te Atiawa of Taranaki. Te Atiawa were defeated and Pukenamu became the site to mark the last of the tribal wars (New Zealand Wars) in Whanganui.

Today, on the surface there is little archaeological evidence of the use of the site as a Pā. However, a terrace on the slopes near the corner of Drews Avenue and Ridgway Street may pre-date European occupation.

The importance of the hill for strategic defence continued during the early days of European settlement. In December 1847 the 58th (Rutlandshire) Regiment occupied the hill and constructed the Rutland Stockade. It consisted of two two-storied blockhouses, two barracks, a messroom, guard room, cook house, hospital and a magazine (store room for ammunition). 32 raupō whare were also built in the area where the Davis Library is now for the accommodation of married troops. The site was occupied intermittently by British troops until January 1870.

In 1872 part of the Rutland Stockade was taken for use as a prison. Later one of the barracks and cookhouse were used as Immigration Barracks. Many of the poorer settlers, regarding the Park Reserve as common ground, built small cottages. In 1875 at least 30 ‘squatters’ cottages could be seen on the slopes of the Park Reserve.

In 1882 the hill was vested in the Domain Board under the administration of the Borough Council. The stockade was dismantled in 1883 and all other buildings were ordered to be removed. The last building to be demolished was the gaol in 1887. Beautification began with the planting of pine trees and grass. In the Whanganui Herald in September 1880 the article read “The ‘city of sand hills’ is being transformed into the city of gardens.” Prisoners were used in the planting and landscaping work.

The central location of the Park Reserve has made it an ideal location for a number of important buildings and memorials.

Further historical detail will be added to this section about the New Zealand and British military and early European settlers in relation to Pukenamu/Queen’s Park.
Summary of Buildings and Structures in Pukenamu/Queen’s Park

The table includes existing and past buildings and structures known to exist. Those items shaded in grey are no longer present in the Park Reserve.

*Items with an asterix are protected in the District Plan.

<td>Rutland Stockade</td>
<td>1847</td>
<td></td>
<td>Rutland Stockade is thought to have been the largest stockade erected in New Zealand at a cost of £3,500. The stockade measured 55 by 30 metres and included two strong wooden blockhouses, one at each end of the enclosed space. Both blockhouses had upper floors that projected almost a metre beyond the lower storeys. They were the first defensive structures with overhanging upper storeys to be built in the North Island. Rutland Stockade was garrisoned by the 58th Rutlandshire Regiment. The stockade saw action when Māori made a first determined attack on Whanganui in May. The situation was considered so serious that another stockade was erected at Papatuhou/Cooks Gardens near where the bell tower now stands.</td>

Glossary

Those terms marked * are as interpreted or defined in the Resource Management Act 1991 or the Resource Management Amendment Act 1993.

Archaeological site: As defined under the Heritage New Zealand Pouhere Taonga Act 2014 means, subject to section 42(3),—
(a) any place in New Zealand, including any building or structure (or part of a building or structure), that—
   (i) was associated with human activity that occurred before 1900 or is the site of the wreck of any vessel where the wreck occurred before 1900; and
   (ii) provides or may provide, through investigation by archaeological methods, evidence relating to the history of New Zealand; and
(b) includes a site for which a declaration is made under section 43(1).

Awa: means river, stream, creek, canal, gully, gorge, groove or furrow.

Conservation: In relation to Chapter 9 – Cultural Heritage as defined under the ICOMOS New Zealand Charter for The Conservation of Places of Cultural Heritage Value, means the process of caring for a place so as to safeguard its cultural heritage value.

CPTED: (Crime Prevention through Environmental Design): The discouragement of antisocial behaviour through design of the built environment using principles based on access management, defining public and private space, and passive surveillance.

Cultural Heritage Significance or Value: As defined under the ICOMOS New Zealand Charter for the Conservation of Places of Cultural Heritage Value means possessing historical, archaeological, architectural, technological, aesthetic, scientific, spiritual, social and community esteem, traditional or other special cultural significance, associated with human activity.

Hapū: means a sub-tribe of Iwi, and is made up of a group of families with a common ancestor.

Heritage item: A landscape, place, precinct, work, monument, structure or building of historical architectural, archaeological, aesthetic, social, cultural, technical, scientific or natural heritage significance.

Historic heritage: means those natural and physical resources that contribute to an understanding and appreciation of New Zealand's history and cultures, deriving from any of the following qualities:
- i. archaeological
- ii. architectural
- iii. cultural
- iv. historic
- v. scientific
- vi. technological; and includes
  - historic sites, structures, places, and areas; and
  - archaeological sites; and
  - sites of significance to Māori, including wāhi tapu; and
  - surroundings associated with the natural and physical resources.

Kāinga: means home, address, residence, village, settlement, habitation, habitat or dwelling.

Mahinga kai: means garden, cultivation or food-gathering place.
Mana Whenua*: as defined under the RMA, means customary authority exercised by an iwi or hapū in an identified area.

Maunga: means mountain, mount or peak.

Network utilities: means those works undertaken by network utility operators as defined in Section 166 of the Resource Management Act 1991 and for the purpose of the district plan, also includes navigation and survey aids, beacons and meteorological activities and the soil conservation, erosion control, river control or flood protection works of regional councils.

Reserves and open spaces: means an area of land or body of water, set aside for landscape conservation or recreation, and may include open space, walkways, seating, water features, gardens, plantings and maintenance of trees and other vegetation, including removal of pest plant species on that land and include ancillary facilities such as parking, toilets, play equipment, information kiosks and accessory buildings.

Structure: means any building, equipment, device or other facility made by people and which is fixed to land and includes any raft.

Excluding: (other than within the National Grid Yard)
   a. Any retaining wall less than 1.5m in height measured from the lowest adjoining ground level.
   b. Any fence or wall (other than a retaining wall) less than 1.8 meters in height measured from the lowest adjoining ground level within 1 metre of a property boundary.
   c. Any pool or tank which is less than 1.0m in height measured from the lowest adjoining ground level.
   d. Play equipment and letterboxes.

Tangata Whenua*: In relation to a particular area, means iwi or hapū that holds mana whenua over that area.

Taonga: means all things that are considered to be treasures and of great value, and includes things that are intangible.

Temporary Activities: means any activity undertaken for a short term duration, either as an isolated event, or as a series of events, where the cumulative period of operation is generally less than one month, and where the activity is undertaken on a site, including any gala, sport event, festival or other community activity and does not result in any permanent structures.

Tikanga Māori*: means Māori customary values and practices.

Vegetation clearance: means the destruction of vegetation by any means, including cutting, burning, clearing or spraying; and excludes clearance of agricultural or horticultural crops, pasture, forest thinnings or coppicing, or any plant defined as a plant pest; or clearance of tracks for the use of foot traffic only; or any clearance for the purposes of a recognised river control scheme or any clearance for the normal maintenance of roads, railway lines and public utility networks; and includes clear felling of forest; and line clearance by bulldozer or similar machine for fences or planting.

(Note: Maintenance of roads, railway lines and public utility networks includes the trimming of adjacent vegetation; but does not include vegetation clearance for new installation, roads, or access ways).

Wāhi Tapu: means a place sacred to Māori in the traditional, spiritual, religious, ritual, or mythological sense.

Whānau: means a family as interpreted in accordance with Māori culture and values.
