**Follow Up Flag:** Follow up  
**Flag Status:** Flagged

Hi Rachael,

I refer to your letter of 22 May and confirm that Airways does wish to roll over its designation (no D45) on existing terms.

On this basis I don't know if it's necessary to complete Form 18 but to provide you with further information I advise as follows (following the questions in Form 18):

1. Site description – same as currently set out
2. The purpose of the designation is for the provision of Air Navigation Services
3. No conditions/restrictions apply – my understanding is that the designation is to ensure we are consulted with regard to operations at the airport.
4. Adverse effects – as there are no change to existing operation we consider there are no or minimal adverse effects.
5. With respect to relevant planning documents, Airways maintains a process of regular monitoring and review of these documents.
6. Alternatives – N/A
7. The designation is necessary to assist with the on-going operation of the Airport.
8. Resource consents – N/A
9. We consider that the only party affected is the Airport Company.
10. We have consulted with the Airport Company and they are comfortable with the designation remaining in place.

Please feel free to contact me if you require any further information.

Kind regards,

Lucy Kebbell
