Proposed Changes to the text are underlined.

Text and Designations that are ~~struck through~~ are proposed to be deleted from the District Plan.

Text highlighted in **Blue** is affected by Submission 1.1.

Text highlighted in **Green** is affected by Submissions 2.1 and 2.2.

Text highlighted in **Grey** is affected by Submission 2.3.

12 DESIGNATIONS

12.1 INTRODUCTION

Designation is the formal process for the requirement authorisation of the use of land for a public work or imposing a restriction in respect of land, water, sub soil or air space a restriction is necessary for the safe or efficient functioning or operation of a public work. It is the equivalent of an alternative to a land use consent application for a public project or work of a network utility.

Designations are shown on the District Plan maps as a red border around the area that the designation applies too. A reference number will also be shown on the maps which will link to the information on this designation held in the District Plan.

Designations can only be held by Requiring Authorities.

A requiring authority is specified in the RMA as any of the following:

- a Minister of the Crown
- a local or regional authority
- a network utility operator, who is approved by the Minister for the Environment, and is someone who:
 - distributes gas, petrol or geothermal energy by pipeline
 - is an electricity operator or electricity distributor
 - distributes water supply (including irrigation)
 - operates a telecommunications or radio communications network
 - operates a sewage system, road or railway line
 - is an airport authority
 - provides approach control services for airports
 - undertakes a work identified by (under a regulation) as a network utility operation.

Once a site is designated for a particular purpose, the requiring authority is able to:

- proceed with the specific work on the site as if it was permitted by the district plan, which may include entering private land to undertake investigations
- control activities that occur on the site, to prevent the landowner doing anything that would compromise the future work (this is the case even if the requiring authority does not own the site)
- apply to the Minister of Lands to compulsorily purchase or lease all or part of the land under the Public Works Act 1981
- enter private land to undertake investigations.

12.2 NEW OR ALTERATION TO ~~ING~~ A DESIGNATION

When Requiring Authorities 'require' a designation land for public work, this is referred to as a Notice of Requirement. When the requirement is included in the Plan, following Council assessment and requiring authority confirmation, it becomes a designation.

12.3 USING A DESIGNATED SITE

When land is designated in the District Plan it can ~~only~~ be used for the purpose for which it has been set aside, regardless of any rules to the contrary in the district plan. ~~Council~~ There may be ~~have imposed~~ conditions that ~~on~~ the designated work has to comply with. ~~However,~~ ~~a~~All designated land has an underlying zoning (generally the zoning which applies to adjacent land) and this zoning applies:

(a) ~~when~~ a designation is removed or

(b) for works which are not in accordance with the designation purpose.

~~Before~~ ~~When an activity~~ undertaking an activity on the designated land that would prevent or hinder the public work ~~not covered by the Designation will occur~~, the applicant must obtain written permission from the Requiring Authority and lodge this with Council.

12.4 OUTLINE PLAN OF WORKS AND WAIVERS

An outline plan of a public work, project, or work to be undertaken on designated land must be submitted by the requiring authority to the Council before the proposed work is commenced, to allow Council to request any changes it considers necessary (refer Section 176A, RMA).

An outline plan must show the physical features of the work, its location and relationship to the site and any other matters to avoid remedy or mitigate any adverse effects on the environment. The outline plan procedure enables Council to better ascertain the effects of future development and comment on how ~~ensure~~ they should be ~~are~~ controlled.

An outline plan is not required if the work has otherwise been approved under the RMA, or if details of the work have been incorporated into the designation or if the Council waives the requirement. ~~The Council will consider granting a waiver~~ A waiver to an outline plan may be ~~granted~~ if the following circumstances apply:

1. ~~The value of the proposed works are low; and~~
2. ~~The work is necessary to the purpose of the designation; and~~
3. ~~The work will not significantly change the built density or scale of the site; and~~
4. ~~There will be no increase in human occupancy on the site.~~

Designations

The Resource Management Act (RMA) gives requiring authorities the ability to have areas of land designated for use as network utilities or large public works.

A requiring authority is specified as any of the following:

- ~~a Minister of the Crown~~
- ~~a local or regional authority~~

- ~~a network utility operator, approved by the Minister for the Environment, is someone who:~~
- ~~- distributes gas, petrol or geothermal energy by pipeline~~
- ~~- is an electricity operator or electricity distributor~~
- ~~- distributes water supply (including irrigation)~~
- ~~- operates a telecommunications or radio communications network~~
- ~~- operates a sewage system, road or railway line~~
- ~~- is an airport authority~~
- ~~- provides approach control services for airports~~
- ~~- undertakes work (under a regulation) as a network utility operation.~~

~~A designation is a provision in a district plan which provides notice to the community that a requiring authority intends to use land in the future for a particular work or project.~~

~~Once a site is designated for a particular purpose, the requiring authority is able to:~~

- ~~proceed with the specific work on the site as if it was permitted by the district plan~~
- ~~control activities that occur on the site, to prevent the landowner doing anything that would compromise the future work (this is the case even if the requiring authority does not own the site)~~
- ~~apply to the Minister of Lands to compulsorily purchase or lease all or part of the land under the Public Works Act 1981~~
- ~~enter private land to undertake investigations.~~

~~As a designation can restrict the use of the land, in the event that the requiring authority does not own the site, the landowner also has certain rights. Where land is subject to a designation the landowner may apply for an order obliging the requiring authority to purchase or lease all or part of the land. In general terms, this is done where the owner is unable to sell the land at a market value, or the owner cannot reasonably use the land.~~

~~While a designation gives a requiring authority 'permission' under the district plan, the requiring authority must still address all the relevant matters under the regional plans — including discharges to air and water and land, and earthworks in some instances. This can include obtaining regional resource consents.~~

~~Note: this text does not form part of the District Plan.~~

Introduction

~~Designation is the formal process for the requirement of land for a public work or in respect of land, water, sub-soil or air space a restriction is necessary for the safe or efficient functioning or operation of a public work to be shown in the District Plan. It is the equivalent of a land use consent application for a public project or work of a *network utility**.~~

1. Application for Designation

~~Under Part VIII of the Resource Management Act, a body with financial responsibility for a particular work can require that land be designated in a District Plan for the particular purpose of that work. A designation gives special powers or rights to the owners of that land and that work related to the use and *development** of that land.~~

Those who can require designations, or those with "requiring authority" status under section 166 of the Resource Management Act, are:

- a. a Minister of the Crown; or
- b. a local authority; or
- c. a "network utility" operator approved as a requiring authority under section 167 of the Resource Management Act.

Under Clause 4, first schedule of the Act, requiring authorities may require existing designations to be included in the *Plan** with or without modification.

When a requiring authority requests a designation be made in a District Plan, by issuing a "notice of requirement" to a District Council, a District Council is obliged to give effect to this request. In terms of section 176 of the Resource Management Act, giving effect to this requirement means:

"(1) Where a designation is included in a district plan, then, notwithstanding anything to the contrary in the district plan and regardless of any resource consent, but subject to sections 9(3) and 11 to 15,:

(a) The requiring authority responsible for the designation may do anything that is in accordance with the designation; and

(b) No person may, without the prior written consent of that requiring authority, do anything in relation to the land that is the subject of the designation including:

(i) Undertaking any use of the land described in section 9(4); and

(ii) Subdividing the land; and

(iii) Changing the character, intensity, or scale or the use of the land:

that would prevent or hinder the public work or project or work to which the designation relates.

(2) The provisions of a district plan shall apply in relation to any land that is subject to a designation only to the extent that the land is used for a purpose other than the designated purpose."

In other words, the effect of a designation is that where a requiring authority owns the land, it can use it for the designated purpose without the need for a resource consent. A District Plan may, however, require the owner of designated land to supply information to allow a District Council to confirm whether a proposed *development** is in accordance with the purpose of the designation.

2. Procedures

The procedures for including either an existing or new designation in a District Plan are laid out in clause 4 of the First Schedule, and Part VIII, of the Resource Management Act respectively.

These procedures include the provision of the following information requirements:

- a. Details of the work.
- b. Alternative sites, routes, and methods considered.
- c. Consultation undertaken with affected parties.
- d. Other resource consents to be obtained.

Information required to be provided by this District Plan shall be included with any notice of requirement for a designation. (Each notice of requirement shall also be accompanied by the prescribed administrative charge).

This information is necessary in order to:

- ~~e. Determine the nature of the proposed work, including its proposed purpose, scale, staging and operation.~~
- ~~f. Identify and understand the actual or potential adverse effects of such a work in terms of the sustainable management of the District's natural and physical resources, and actual or potential adverse *effects** on the *environment**, people and communities.~~
- ~~g. Determine what types of conditions may be necessary in order to avoid, mitigate, or remedy any actual or potential adverse *effects**.~~

After considering a notice of requirement, the District Council will make a recommendation to the requiring authority to the effect that the requiring authority either:

- ~~h. Confirm the requirement, along with any conditions considered appropriate by the District Council; or~~
- ~~i. Withdraw the requirement.~~

3. Designation Requirements

All requirements for designations received by the *Council** to date for inclusion in the District Plan and the *Council's** own requirements for designations are listed in Appendix A3. All future roading for which the *Council** has a requirement for a designation are shown on the planning maps.

Rules Applicable to Designations

4. Underlying zoning

Designated land is to be zoned to indicate the purpose for which the land shall be used if it was not designated, and the actual or potential adverse effects of any work proposed to be undertaken on designated land that is outside the intended purpose of the designation, will be avoided, mitigated, or remedied in terms of the provisions of the underlying zoning.

5. Required information

A notice of requirement for a designation shall include the following information:

- ~~a. Sufficient drawings at appropriate scales to adequately illustrate the proposed work.~~
- ~~b. Whether the proposed work is a public work in terms of the Resource Management Act, or is a restriction in respect of any land, water, subsoil, or airspace for protecting the safe and efficient functioning of a public work, or if the requirement is for a proposed project or work by a network utility operator approved as a requiring authority under section 167 of the Resource Management Act (if an approved requiring authority, details of the Order in Council or Gazette Notice empowering the body as a requiring authority shall be supplied, including any specified conditions and terms).~~
- ~~c. A statement of the objectives of the requiring authority that the requirement is necessary to achieve.~~
- ~~d. The manner and degree to which the work complies with Part II of the Act.~~
- ~~e. The manner and degree to which the work is consistent with any relevant provisions of national and regional policy statements and regional plans.~~

- ~~f. The manner and degree to which the work meets the objectives and policies of this District Plan.~~
- ~~g. Details of the current ownership of the subject land, of any proposed land acquisition programme, and of any site clearance proposals.~~
- ~~h. The proposed sequence and timing of implementation of the work or project, clearly identifying any part of the work which may not be commenced for 5 years or more.~~
- ~~i. Proposals for the use and maintenance of those parts of the land and associated *structures** which will not be developed for 5 or more years.~~
- ~~j. Details of the actual or potential adverse *effects** the project or work may have on the *environment**, and any proposed measures to avoid, mitigate, or remedy these adverse *effects**. In addition, a description of the methods used to assess longer term and cumulative actual or potential adverse effects on the *environment** shall be provided.~~
- ~~k. Details of any hazardous substances that may be used in the construction or operation of the work, and management techniques to be used to avoid, mitigate, or remedy any actual or potential adverse effects from the transportation, storage, use, and disposal of these hazardous substances.~~
- ~~l. If a site is already designated, or is subject to a heritage protection order, or is subject to a requirement for a heritage protection order, a statement as to the purpose of the designation or order, whether the designation has been fully put into effect (or the extent to which it has been put into effect), and the generated actual or potential adverse effects of the existing designation or order.~~
~~If appropriate, the District Council may require the requiring authority to submit further information as may be necessary for the District Council to better understand the nature of the proposal, any actual or potential adverse *effects**, details of any consultation undertaken and the outcome of this, or any mitigation measures that are proposed or may be imposed. This may include the submission of outline plans as specified below.~~

6. Conditions

The District Council shall recommend such conditions as are necessary to avoid, mitigate, or remedy any actual or potential adverse *effects** identified in the required information as submitted by the requiring authority. Such conditions will be appropriate to the circumstances, and may address (but are not limited to) the following:

- ~~a. The period within which the designation is to be given effect.~~
- ~~b. The operation or design of the project or work, particularly with regard to the avoidance, mitigation, or remedying of adverse effects of activities and structures on the *environment**.~~
- ~~c. The maintenance of the subject land.~~
- ~~d. The obtaining of any resource consent that may be required to enable the establishment and operation of the proposed activity.~~

~~e. Compliance, where practicable, with any relevant rules relating to the vicinity in which the proposed is to be sited.~~

~~f. The submission of outline plans regarding the *development** of the proposed work or project.~~

~~g. The requirement of financial contributions.~~

~~h. The payment of administrative charges.~~

~~Other conditions may also be recommended according to the particular proposal, its nature, site, location, and the relevant provisions of the District plan and Resource Management Act.~~

7. Alteration of designations

~~Where a requiring authority which is responsible for a designation wishes to alter the designation it may give notice of its requirement to alter the designation in accordance with Section 181(3) RMA and all the provisions of that section will apply, in such a case that requiring authority shall:~~

~~a. Give notice to the District Council, when the requiring authority is able to supply all the information, of its requirement for the District Council to alter its designation in the District Plan provided, in accordance with Section 181(3) of the Resource Management Act:~~

~~(i) If the alteration:~~

~~Involves no more than a minor change to the *effects** on the *environment** associated with the use or the proposed use of land or any water concerned; or~~

~~Involves only minor changes or adjustments to the boundaries of the designation; and~~

~~(ii) Written notice of the proposed alteration has been given to every owner or occupier of the land directly affected and those owners or occupiers agree with the alteration.~~

~~(iii) Both the District Council and the requiring authority agree with the alteration. or:~~

~~b. If the requirements above are unable to be met, the notice will be treated as if it were a requirement for a new designation, when the requiring authority is able to supply all the information.~~

~~c. In accordance with Section 181(4) of the Resource Management Act, the requirements of 7(a) and (b) above shall apply to the District Council in respect of its own designation requirements.~~

8. Outline plans

~~a. Prior to the commencement of construction of works by or on behalf of a requiring authority on designated land, the following shall be submitted to the District Council for its consideration and approval:~~

~~(i) An outline plan/s of the proposed works.~~

~~Any temporary work which the person or body responsible for its construction~~

~~considers is immediately necessary to meet an emergency situation may be constructed without first advising the District Council, if an outline plan or plans of the work are submitted to the District Council as soon as practicable after the work has commenced.~~

~~**b.** Outline plans shall detail, as relevant:~~

~~(i) The purpose of the work.~~

~~(ii) The height, shape, and bulk of the proposed work.~~

~~(iii) The location of the proposed work on the site.~~

~~(iv) The likely finished contours of the site.~~

~~(v) Vehicular access and circulation.~~

~~(vi) Landscape design provisions.~~

~~(vii) Any other matter as specified in conditions that may have been recommended by the District Council and accepted by the requiring authority when confirming the requirement for the designation.~~

~~**c.** The provisions of this rule shall **not** apply in the following circumstances:~~

~~(i) any work which the person or body responsible for its construction considers is immediately necessary:~~

~~to safeguard life or property; or~~

~~to maintain or restore communication or transport links; or~~

~~(ii) such other works for which it is considered to be impracticable or unnecessary to prepare outline drawings.~~

~~**d.** Outline plans need not be submitted to the *Council** if details of the proposed work were supplied when a requiring authority issued a notice of requirement in respect of the work under section 168 of the Resource Management Act.~~

~~**e.** The District Council, after considering the proposals contained in the outline plan/s, may, within 20 working days after receipt of the plan/s, either:~~

~~(i) Approve the outline plan/s, certifying that the works as detailed in the outline plan/s are in accordance with the designated purpose of the land and are in accordance with any conditions agreed to when the requirement for the designation of the land was confirmed.~~

~~(ii) Request the requiring authority to make changes to all or any of the details contained in the outline plan/s so that the proposals comply more fully with the conditions imposed.~~

9. Purpose

The purpose of the above rules are to:

~~**a.** Ensure that any works proposed are to be undertaken by a requiring authority responsible for a designation, is in accordance with the purpose/s of the designation.~~

~~**b.** Avoid, mitigate, or remedy any actual or potential adverse effects of designations and work undertaken in accordance with designations, on people, the community, adjoining land uses, *natural and physical resources** and the *environment**.~~

~~* refer to definitions~~
