### Key

Proposed Changes to the text are underlined.

Text and Trees that are ~~struck through~~ are proposed to be deleted from the District Plan.

District Plan numbers in [brackets] are the numbers used in the notified plan change.

Text highlighted in Grey is affected by a submission. The submission reference number is at the bottom of the page.

## 7.1 [25.1] ISSUES

### **7.1.7 [25.1.1] Protection of significant Trees**

Trees that make up a part of Wanganui's history, culture, amenity or contain unique ecological value need to be identified and protected from development. Their removal or modification may result in a reduction in amenity and quality of Wanganui's environment.

## 7.2 [25.2] OBJECTIVES

### **7.2.6 [25.2.1] Tree protection**

Recognition and protection of trees with significant historical, cultural, amenity or ecological value to the community.

## 7.3 [25.3] POLICIES

### **7.3.14 [25.3.1] Retention of Trees**

To recognise and protect significant trees (or groups of trees) that contribute to the history, ecology, character or amenity for the Wanganui community as identified in Appendix C.

### **7.3.15 [25.3.2] Protection of Trees**

To manage land use and development to avoid, remedy or mitigate any adverse effect on protected trees.

### **7.3.16 [25.3.3] Protected Tree Promotion**

To promote the history, location and special features of significant trees to the public.

### **7.3.17 [25.3.4] Length of Tree Protection**

Protected Trees shall be retained for their natural life unless this would create an immediate risk to life or property.

### **7.3.18 [25.3.5] Propagation of Trees**

To recognise that trees have a finite lifespan and to require the re-planting of progeny in the same or related location, when a protected tree has reached the end of its life.

### **7.3.19 [25.3.6] The removal of Protected Trees**

Any application to modify or remove a Protected Tree shall be assessed against the following:

- a. Whether the tree is near the end of its natural lifespan or if the work will extend the life of the tree
- b. The ability to replant with off-spring from the tree with a root ball of no less than PB40 (note that some species have a higher requirement)

- c. How the location is to be cleared and restored after removal of the tree
- d. The historical, cultural, amenity or ecological value of the tree
- e. An independent Arborist\* assessment on the condition of the tree and any works to be completed
- f. The mulching and definition of the extent of the root/drip line to prevent future damage to the tree or its replacement

## 16.6 [25.5] DISTRICT WIDE METHODS

### **16.5.42 [25.5.1] Protected Tree Database**

Maintain a comprehensive database of protected trees using STEM, derived primarily from the 1988 Historic, Notable and Aesthetic Trees, 1993 Protected Tree Inventory, the 2013 updating of the Inventory and on-going research and requests from the public. The database will be reviewed bi-annually by a suitably qualified person.

### **16.5.43 [25.5.2] Protected Tree owners advice**

Establish a system of consultation and advice to owners of protected trees regarding maintenance, root protection and progenation.

### **16.6.44 [25.5.3] Tree Maintenance Programme assistance**

Provide free assistance to owners of protected tree inventory items in the preparation of maintenance or conservation plans when required.

### **16.6.45 [25.5.4] Resource Consent fees**

Waive resource consent fees for Protected Trees where the work will enhance the value and life expectancy of the tree.

### **16.6.46 [25.5.5] Determination of value**

The method that will be used to determine whether the tree should be listed in Appendix C shall be:

- a minimum score of 150 under STEM (Standard Tree Evaluation Method); or
- an explanation on why a particular tree has significant value to the community beyond what is recognised in STEM.

### **16.6.47 [25.5.6] Protection of Trees**

The principal method is to regulate land use and development that may effect trees identified as Protected Trees in Appendix C.

## 7.6 RULES - PROTECTED TREES/ INDIGENOUS FOREST & RIPARIAN MARGINS

### R18 General Rule – Protected Trees

#### Rules Number: R18

---

The following rules apply to any tree shown as a protected tree in Appendix A2 C- Protected Trees.

#### 7.6.1 [25.4.1] Permitted activities

The following are permitted activities throughout the District:

- a. Minor maintenance to any protected tree. This is limited to:
  - i. clearance of foliage or branches no greater than 100mm in diameter from existing utility networks, street lights or land boundary encroachments that does not alter the shape or health of the tree;
  - ii. clearance of foliage or branches no greater than 100mm in diameter from roads, footpaths and driveways that does not alter the shape or health of the tree;
  - iii. removal of deadwood from trees;
  - iv. the removal of dead or diseased vegetation;
  - v. clearance and clean-up after storm damage including broken branches;
  - vi. Fencing of Protected trees within the dripline when the location of the fence is approved by an Arborist and the assessment submitted to Council;
  - vii. Controlling pest plants and weeds within the dripline by methods not harmful.<sup>1</sup>
- b. Destruction or removal of any protected tree with an Arborist assessment submitted to Council stating the work is:
  - i. An emergency work to maintain or restore existing power or telecommunication links, or
  - ii. To safeguard life or property.

#### 7.6.2 [25.4.2] Controlled activities

The following are controlled activities throughout the District:

- a. Alteration of the shape or health of a protected tree as part of a Tree Maintenance Program.
- b. Removal of a protected tree that will be replaced with the progeny of the same tree.

#### 7.6.4 [25.4.3] Discretionary activities

The following are discretionary activities throughout the District:

- a. The modification, destruction or removal of any protected tree except as provided for above.

---

<sup>1</sup> Submission 2.1

b. Any activity including excavation, construction or reconstruction work within the drip line\* of a protected tree, unless stated as a permitted activity<sup>2</sup>.

Link to more [Protected Trees](#) information.

## 13 DEFINITIONS

### **Arborist**

means a person who, through experience and qualification, is considered by Council to hold specialist knowledge and expertise in the maintenance of trees generally or the maintenance of protected trees.

### **Drip line**

means the ground surrounding a protected tree that is covered by the canopy plus a 0.5 metre buffer zone. Columnar Trees' drip line shall be a third of the height of the tree either side of the centre of the tree.

### **Protected Tree**

means any tree listed in Appendix A2 C of the Plan.

### **Tree Maintenance Programme**

means a programme of works specified for up to five years that has been developed with the assistance of an approved Council Arborist or tree surgeon.

---
